Workforce Health Solutions Made Easy

# Environmental Health and Safety

“ Businesses spend \$170 billion a year on costs associated with occupational injuries and illnesses – expenditures that come straight out of company profits. But workplaces that establish safety and health management systems can reduce their injury and illness costs by 20 to 40 percent. ”

–U.S. Department of Labor Occupational Safety and Health Administration (OSHA)

## A SAFE WORKPLACE IS A PRODUCTIVE WORKPLACE.

Here are a few of the ways we can work with your safety and industrial hygiene staff:

- Anticipate, recognize, evaluate, and control factors in the workplace that may cause adverse health effects
- Monitor and assess employees for physical, chemical, and biological hazards
- Evaluate engineering, administrative, and personal protective equipment controls for workplace hazards
- Determine and design workplace hazard mitigation programs, such as education, training, and medical monitoring
- Evaluate injuries and health issues to assess and control contributing factors
- Ensure compliance with OSHA regulations and specific program requirements
- Evaluate U.S. Environmental Protection Agency (EPA) compliance issues with hazardous materials and waste streams

By integrating our capabilities, you can include a variety of workplace surveillance strategies in your program, including OSHA and EPA compliance and employee medical monitoring to keep your workforce safe and healthy.

A comprehensive and effective program also provides your company with the assurance of regulatory compliance and lower workplace risks, higher employee productivity, greater community confidence, and reduced liability costs.
