Workforce Health Solutions Made Easy

On-location Medical Events

Through our network of approximately 9,500+ health care professionals, including doctors, nurse practitioners and nurses, we can bring our expertise and workforce health management solutions to you wherever and whenever they're needed to support your business needs.

For example, we can provide exam management services at your office or other locations. Whether it is setting up a short-term clinic in your office or providing a mobile van with the capabilities of a small clinic, we work with you to meet your needs.

Bringing our exam services to you is more convenient and efficient, allowing a large volume of tests to be done quickly, resulting in less downtime for employees. Bringing our services to you also reduces delays since our medical staff can speak directly with you about any questions that arise in the course of making medical determinations or conduct retesting quickly, if needed, as we supply exam results to you.

Examples of services we can provide are:

- Routine and compliance physical exams
- Vision screening
- Immunizations
- Audio screening
- Spirometry testing (assessment of lung function)
- EKG testing
- Blood collection
- Urine collection
- Drug screen collection
- Respirator fit testing
